

WORK IN PROGRESS

Hello!

We are pleased to inform you that our company is radically **changing the operating system**, from Navision to Dynamics 365 Business Central.

This new method of work enables us **better interaction** with our customers regarding production, sales, shipments, project management and assistance.

It's a single comprehensive solution to meet the needs of growing business.

We want to inform you that, due to this change, there may be slowdowns with the deliveries set previously. Our priority is to satisfy your requests in the best way as soon as possible.

Best regards.
